

Counting Nature and the Nature of Counting

Professor Natasha Affolder

University of British Columbia Faculty of Law

How do we measure?

- Human rights?
- Anti-Corruption?
- Biodiversity Protection?
- Climate Change?

Biodiversity: the need for metrics

Some examples:

- IUCN Red List and The Red List Index
- World Heritage List and its Danger List.
- IUCN Protected Areas Categories
- NGO approaches – e.g. “Biodiversity Hotspots”
- The Ocean Health Index

Creating and Using Indicators as a Social Process

Indicators and International Environmental Agreements

The Interplay of Biodiversity Indicators

Competition for Indicators

The geographies of expertise

The list makers and the list takers.

Possibilities for reflexivity in international environmental law's use of biodiversity indicators.
